DETAIL OFFICE ACTION

Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 and 15-16, drawn to an embedded controller, classified in class 701, subclass 1.
 - II. Claim 8-14 and 17, drawn to an embedded controller development tool, classified in class 707, subclass 100.
2. The inventions are distinct, each from the other because the inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions. Group I, refers to an embedded controller which includes an external input processing means, a control operation means, an external output processing means, a control basis processing means, and an interfacing means; while group II refers to an embedded controller development tool which includes an interface means for preserving and outputting a control data by the control operation means as a function in the source code of the program, the reference used for calculation by the control operation is an argument of the function, and the control data calculated by the control operation means

is the argument of the function which points the return value or the address of the function.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Tan Nguyen, whose telephone number is (571) 272-6966. The examiner can normally be reached on Monday-Thursday from 5:30 AM-4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black, can be reached on (571) 272-6956.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks
